PROFILE

A career finance professional who is looking to move into an Apprenticeship/Junior role as a Software Developer. Core skills are in front end development and studying this area further in-depth with a strong interest in studying back end technologies.

SKILLS

HTML

CSS

JavaScript

Git

PROJECTS

Personal Portfolio [🔗](#)

- Built my personal portfolio using HTML and CSS.
- Showcased my projects and a small profile about myself.

Step by Step Recipes [🔗](#)

- Produced a recipe website using HTML and CSS.
- The main objective was to practice using Flexbox and working with positioning on the page.

Car Builder [🔗](#)

- Produced this builder using HTML, CSS and JavaScript.
- The purpose of this webpage was to put my JavaScript skills into practice.
- The user of this site can build a card by filling out the form and then pressing save. This would add a card to the deck with the attributes they have chosen.

Bouncing Balls [🔗](#)

- Made this page using HTML, CSS and JavaScript.
- Previously built a page with just one bouncing ball and challenged myself to add more balls.
- Used random figures as starting points in the code allows the balls to bounce in different directions.
